Summary

Experienced DevOps Engineer with 6.4 years of hands-on expertise in designing, deploying, and managing scalable, secure, and cost-efficient **AWS cloud infrastructure**. Proficient in **CI/CD automation**, **Docker**, **Kubernetes**, **Terraform**, **Infrastructure as Code (IaC)**, **Jenkins**, **GitHub Actions**, **AWS CodePipeline**, monitoring, and system reliability. Skilled in implementing **serverless architectures** using **AWS Lambda** and **Amazon API Gateway**, managing cloud-native applications on **Amazon EKS**, and optimizing cloud resources for performance and cost efficiency. Strong collaborator with a proven track record of delivering reliable and secure cloud solutions for **pharmaceutical** and **enterprise applications**.

Skills

- AWS (VPC, EC2, S3, RDS, CloudFront, Lambda, API Gateway, IAM, WAF)
- Azure (App Service, Key Vault)
- Databricks & Databricks Asset Bundles (DABs)
- Terraform
- Docker
- Kubernetes & Amazon EKS
- Jenkins
- GitHub Actions
- AWS CodePipeline & CodeBuild
- Azure DevOps
- Prometheus & Grafana
- Splunk
- Amazon CloudWatch & CloudTrail
- Dell Boomi
- SQL
- Python (Basics)
- Linux, Git & Bitbucket
- Jira & ServiceNow

Experience

Senior DevOps Engineer **07/2025 to Current**
Agilisium **Chennai, India**

- Administer and maintain **15 Databricks workspaces** across multiple environments, ensuring platform availability, operational stability, and secure access governance (user onboarding, permission cleanups, and **role-based access control** across catalogs and schemas).
- Design and maintain **CI/CD pipelines** using **Jenkins**, **GitHub Actions**, and **Azure DevOps** to automate build, validation, infrastructure provisioning, and application deployments across Dev, Test, UAT, and Production.
- Develop and optimize **Dockerfiles** and container images, deploying containerized applications to **Kubernetes** and **Amazon EKS** while troubleshooting cluster health and workloads.
- Provision and manage **AWS** and **Azure** infrastructure using **Terraform** and **IaC** principles (VPC, EC2, S3, RDS, CloudFront, API Gateway, Lambda, Azure App Service, and Key Vault).
- Design **serverless architectures** utilizing **AWS Lambda**, **API Gateway**, **S3**, and **EventBridge** to support scalable, event-driven applications.
- Implement **AWS Security Best Practices** (**IAM** least-privilege, Security Groups, NACLs, **AWS WAF**, and **CloudTrail**) to strengthen compliance and protection.
- Configure centralized monitoring, logging, and alerting through **Amazon CloudWatch** and **Splunk** to improve incident detection.
- Execute **AWS Cost Optimization** strategies via **AWS Cost Explorer** and **AWS Compute Optimizer**, achieving a monthly cloud cost reduction of approximately **20%**.
- Automate **Dell Boomi** integration deployments and **Databricks Model Serving** endpoint integrations through **CI/CD pipelines**.
- Implement **Databricks Asset Bundles (DABs)** and environment-specific deployment safeguards to prevent unintended resource deletions.

DevOps Engineer **08/2022 to 06/2025**
Agilisium **Chennai, India**

- Managed **AWS Cloud Infrastructure** focusing on **high availability**, security, scalability, and performance.
- Built and maintained **Docker** container images and deployed **microservices** onto **Kubernetes** and **Amazon EKS** clusters.
- Developed reusable **Terraform modules** for automated provisioning of core AWS services.
- Configured **automated backups**, **cross-region replication**, and **S3 lifecycle management** to enforce business continuity and **disaster recovery** procedures.
- Collaborated within **Agile/Scrum** cross-functional teams to deliver secure and reliable cloud solutions.

Application Support Engineer **02/2021 to 08/2022**
IDC Technologies Solutions Pvt. Ltd.

- Monitored application performance and infrastructure health using **Grafana**, proactively identifying bottlenecks and improving service reliability.
- Investigated **production incidents**, conducted **root cause analysis (RCA)**, and executed **smoke/functional testing** post-deployment.
- Collaborated with development, QA, and external vendors to resolve incidents and ensure strict **SLA compliance**.

Associate **07/2019 to 02/2021**
Accenture **Chennai, India**

- Provided **L1/L2 Technical Support** for **Windows** environments, troubleshooting operating systems, hardware, software, and networking issues.
- Administered **Active Directory** user accounts, **Group Policies**, provisioning, and onboarding/offboarding workflows.
- Supported **Microsoft Office 365**, **Outlook**, and **Microsoft Teams** while handling routine **system administration** and **patch management**.

Education

Bachelor of Computer Science **06/2019**
Madras University

Certifications

- AWS Certified Solutions Architect – Associate
- AWS DevOps Professional
- GitLab Fundamentals
- Boomi Administrator
